

Celery

Early Bella

Type: Celery Leaf, Early Bella
Apium graveolens

Genesis Organic Breeding

Genesis Seeds
Proprietary

Plant description:

- Early, 80–85 days from planting to harvest
- Tall vigorous upright plants
- Certified organic production
- Adapted to early autumn sowing season
- Relative tolerance to cercospora*
- Full sun, open-field production

*Early Blight (*Cercospora apii*)

Early Belle and June Belle are two varieties with good early blight resistance. Florida 683 and 2-14 are most susceptible and should not be planted except for the cooler months. See Plant Pathology Fact Sheet PP-8.

Certified organic production

The information and uses provided are only indicative and will therefore not be considered as a guarantee of harvest. Local tests should prevail.

(Plant description, Continued):

- 125.000–150.000 Plants/Ha.

Leaf description:

- Dark green, Taste with mild flavor
- Tender, less fibrous
