

# Celery - Early Bella

Type: Celery Leaf, Early Bella  
*Apium graveolens*

Genesis Organic Breeding

## Plant:

Early, 80-85 days from planting to harvest

Tall Vigorous upright plants

Certified organic production

Adapted to early autumn sowing season

Relative tolerance to cercospora\*

Full sun, open-field production

125.000-150.000 Plants/ha

## Leaf:

Dark green, Taste with mild flavour,  
Tender, less fibrous

## \*Early Blight (*Cercospora apii*)

Early Belle and June Belle are two varieties with good early blight resistance. Florida 683 and 2-14 are most susceptible and should not be planted except for the cooler months. See Plant Pathology Fact Sheet PP-8.

The information and uses provided are only indicative and will therefore not be considered as a guarantee of harvest. Local tests should prevail.
