Good things grow naturally

SINCE 1994

New Lettuce Breeding

Having both summer and winter covered by two leading romaine type lettuce – Dov and Super Jericho respectively, we put more effort this year into stabilizing new red lettuce clones with darker red color, in different levels of curliness. We've accomplished two new varieties (all names are temporary):

LRD

- Dark red
- Very curly
- Relatively small Lola Rosa type

MT

- Dark red
- Half curly
- Bigger head lettuce

Together with the already commercial Gilad (Romaine type red lettuce), these varieties cover the whole range of red curly lettuce, with great weather-resistant dark red color.
